Financial Ratio Analysis of Indian Banking Sector

Name: Shreyansh Tripathi

Course: BBA

College: Bennett University

1. Introduction

This project focuses on the financial analysis of three major Indian banks: HDFC Bank, ICICI Bank, and State Bank of India.

These banks are among the largest and most influential financial institutions in India. The study analyzes their financial performance over the period 2021 to 2024 using key financial ratios and metrics.

2. Objective

The objectives of this project are:

- To compare the financial performance of major Indian banks
- To analyze profitability, efficiency, and growth trends
- To understand how banks utilize their resources
- To create an interactive dashboard for better visualization

3. Methodology

The analysis was conducted using Microsoft Excel.

The following steps were followed:

- Collection of financial data (Profit, Revenue, Equity, Loans)
- Calculation of key financial ratios such as ROE, Profit Margin, and Growth Rate
- Conversion of data into metric format for advanced analysis
- Creation of pivot tables and charts
- Development of an interactive dashboard using slicers

4. Data Analysis

Profit Analysis

Among the three banks, HDFC Bank and State Bank of India show strong profit growth over the years. ICICI Bank also demonstrates consistent improvement in profitability.

Return on Equity (ROE)

ROE indicates how efficiently a bank uses shareholders' funds. HDFC Bank maintains a stable and strong ROE, while ICICI Bank shows improvement over time. SBI shows comparatively moderate efficiency.

Growth Analysis

Growth trends indicate that ICICI Bank and HDFC Bank are expanding steadily, while SBI shows growth with fluctuations due to its large size and operational scale.

Loan Analysis

State Bank of India has the highest loan base, indicating its large market presence. HDFC Bank and ICICI Bank show strong and consistent loan growth.

5. Dashboard Explanation

An interactive dashboard was created to visualize the data effectively.

The dashboard includes:

- Profit comparison chart
- ROE trend chart
- Growth analysis chart
- Loan comparison chart

Slicers were used for:

- Company
- Year
- Metric

These slicers allow users to dynamically filter and analyze the data, making the dashboard interactive and user-friendly.

6. Key Insights

- HDFC Bank shows strong and stable financial performance
- ICICI Bank demonstrates high growth potential
- State Bank of India has the largest scale of operations

- Private sector banks are more efficient compared to public sector banks
- All three banks show positive growth trends

7. Conclusion

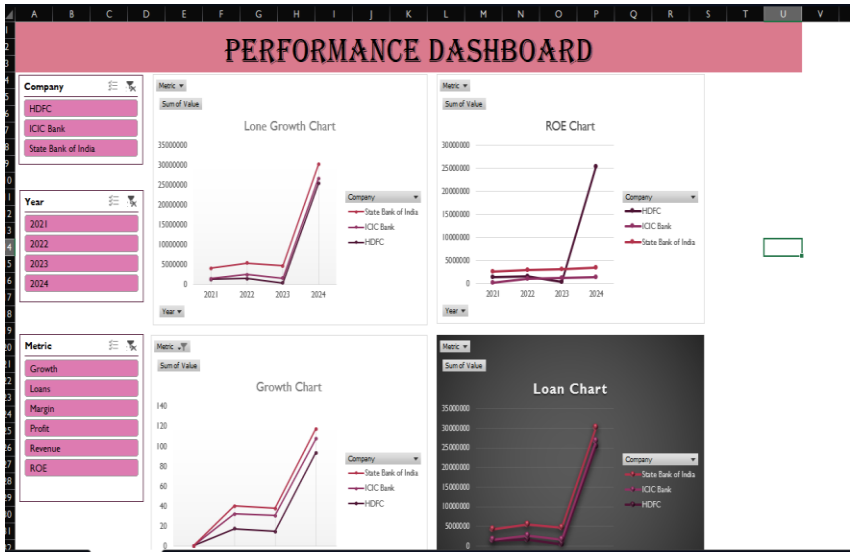
Based on the analysis, HDFC Bank stands out in terms of consistency and efficiency. ICICI Bank shows strong growth and improving performance. State Bank of India dominates in size but shows relatively moderate efficiency.

Overall, the project highlights the strengths and differences in performance among major Indian banks.

8. Tools Used

- Microsoft Excel
- Pivot Tables
- Charts and Dashboard
- Data Analysis Techniques

9. Learning Outcomes

Through this project, I learned:


- How to analyze financial data in the banking sector
- How to calculate and interpret financial ratios
- How to build interactive dashboards
- How to compare company performance effectively
